

# Manufacturer's Cleaning Guide

## How To Clean PIG Grippy Floor Mat

- Sweep to remove dirt and debris as needed.
- Vacuum daily, particularly in high-traffic areas, to remove dry soils.
- Spot clean spills and stains as they occur. See below for complete instructions.
- You can also scrub your mats while you're cleaning the rest of your floors. Leave the mats in place and mop or run your floor scrubber right over the top. PIG Grippy Floor Mats are compatible with most common floor cleaners. Always vacuum excess water to prevent loosened soils from resettling into the mats.
- Deep clean your mats to freshen their appearance if they begin to stain or show grime and residue (such as salt) that vacuuming doesn't remove. Simply wet the mat with clean, hot water and extract the water and soil with a shop vac, rug scrubber or carpet extractor.

## How To Remove Stains From PIG Grippy Floor Mat

Remove stains as soon as possible after they appear. Drinks, fruit or other watery substances can be removed with clean, hot water. Oily, greasy stains may require a degreaser. Follow these four easy steps for best results:

1. Vacuum the area thoroughly.
2. Soak the stain by spraying it with water or cleaner, and let it sit for a few minutes.
3. Agitate with a stiff bristle brush.
4. Extract the stain with a rug scrubber, water extractor or shop vac. Higher suction will produce better results.

## Maintenance Tips

### Drying

A fully saturated Grippy Mat dries in 4–5 hours after scrubbing it. Using a blower will speed up evaporation and cut drying time in half.

### Buffing

Leave your Grippy Mats in place while you buff the floor around them. They're tough enough to take a bump without moving or affecting performance.

### Stripping and Waxing

Schedule your strip and wax to coincide with your Grippy Mat changeout. This minimizes labor and eliminates replacing your mats before you need to.
