

## MULTI-USE URINE AND VOMIT SPILLS KIT

### BEFORE YOU START:

Always wear gloves and an apron.

Wherever possible ensure good ventilation.

Avoid contact with Hydrofluoric acid

1

Sprinkle Absorbent Granules over the entire spill until all the moisture has been absorbed. Leave for 30-60 seconds.

2

Peel backing away from adhesive strip on disposal bag. Set up the disposal bag close to the spill.

3

Collect spill and granules mixture using scoop and scraper. Discard all into the yellow disposal bag.

4

Use an Alcohol Surface Wipe to clean the area of the spill and remove any smears.

5

Place all the used materials, gloves last, into the disposal bag. Use the backing strip to tie the bag securely.

6

Dispose of bag in accordance with your local clinical waste policy.

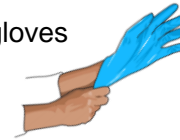

**NOW WASH YOUR HANDS.**

**Note: Never use this kit for blood or blood-stained body fluid**
